

Software to increase sales and decrease internal theft.

Access Manager software helps increase retailers' profits by reducing internal theft. The cloud based enterprise system logs OneKEY™ device interactions, making it easy to detect associate activity that is suspicious with access anytime and anywhere. Using an intuitive user interface,

individual associates are enabled with access to the entire store, a department or individual InVue device.

Access Manager works with multiple InVue devices across all security solutions.

OVERVIEW

Profitability

- › When internal theft decreases and store revenues increase, store profits rise
- › Access Manager is a single investment that provides solutions to two significant retailer measurements

Measurement — Increase Store Revenue

- › OneKEY access allows ease of use by the store team, reducing customer wait times in receiving merchandise locked away
- › Associates therefore gain more time to sell and assist more customers, in effect increasing conversion rates

Measurement — Reduce Internal Theft

- › Theft within store walls can be difficult to track
- › Access Manager provides a bird's eye view of when merchandise and display devices are being accessed and by whom

Auditing & Zoning

- › Controlled employee access to the entire store, specific departments or even particular displays
- › Data collection from the keys offers a view into all team member activity

KEY BENEFITS

Cloud Based Data

- › Data can be accessed anywhere, anytime
- › Historical data can be accessed easily over time

System Hierarchy

- › Segment employee interactions by headquarters, division or individual store
- › Updates can be made easily to the hierarchy

Store Format(s) Naming

- › All zones and devices are named consistently across the estate
- › Predetermined zones are defined for specific store formats

Single Sign On

- › Access Manager permissions at HQ and store
- › Automatic role assignment at HQ

Access Manager

WHO IT WORKS WITH:

Associate access can be set at different levels.

Store Manager
(The entire store)

Team Member
(A department)

Seasonal Employee
(A single lock/position)

HOW IT WORKS:

The OneKEY collects the data that allows Access Manager to share who accessed a position and when.

KAS connected
to Ethernet port

Data sent to Access Manager
cloud storage

Data accessed anywhere,
store or corporate

WHERE IT WORKS:

The OneKEY works across all of InVue's major product lines.

Handheld Electronics

Wearables

Electronic Accessories

Smart Locks

Commercial Solutions
